Journal of Materials Processing Technology

www.elsevier.com/locate/jmatprotec

Subject Index of Volume 118/119

AA7475 alloy
The influence of the thermomechanical processing and forming parameters on superplastic behaviour of the 7475 aluminium alloy, **118** 397
Adhesive joints
Analysis of stiffness of adhesive joints in car bodies, **118** 95
Adiabatic shear bands
Study of the formation of adiabatic shear bands in steels, **119** 234
AEREX350
Structure and strain hardening of superalloy AEREX350, **118** 246
Aerosol deposition
Aerosol processing of functionally engineered cermet emitters, **119** 104
Aerospace
Surface integrity of a high speed milled gamma titanium aluminide, **118** 143
Ageing
The effects observed in engineering materials after annealing and ageing processes, **119** 165
Agent
Analysis on accuracy of forging die sets by disassembly planning algorithm with multiple agents, **119** 140
Al alloy-based composite
Processing and characterization of cluster diamond dispersed Al–Si–Cu–Mg composite, **119** 216
Al–Mg alloy
A study on the hot-deformation behavior and dynamic recrystallization of Al–5 wt.%Mg alloy, **118** 356
Alternatives to animal testing
Issues in pre-clinical testing of implants, **118** 337
Alumina
Microwave joining of 48% alumina–32% zirconia–20% silica ceramics, **118** 88
Aluminium
Characterisation and tribological evaluation of a nickel surface alloyed aluminium-based material, **118** 187
Identification of the damage parameters for anisotropic materials by inverse technique: application to an aluminium, **118** 472
Aluminium alloy
Ductile tearing energy of aluminium alloy sheets determined by the single tensile testing (STT) method, **118** 316
Aluminium–ferro-chromium composites produced by recycling of chips, **119** 251
Quench sensitivity and tensile property inhomogeneity in 7010 forgings, **119** 261
Amorphous materials
A review on magneto-impedance effect in amorphous magnetic materials, **119** 312
r- and *n*-values
Factors influencing the FLD of automotive sheet metal, **118** 1
Anisotropy
A vision-integrated tension test for use in sheet-metal formability studies, **118** 238
Annealing
The effects observed in engineering materials after annealing and ageing processes, **119** 165
Artificial intelligence
Development of a hybrid neural network system for prediction of process parameters in injection moulding, **118** 109
Automobile bumpers
Preliminary investigations into the mechanical properties of a novel shock absorbing elastomeric composite, **119** 379
Automobile parts
Automobile leaf springs from composite materials, **118** 58
Average crossing angle
Study on super-finishing by CBN stone (estimation of cutting performance using average crossing angle), **118** 429

Back propagation algorithm
Development of a hybrid neural network system for prediction of process parameters in injection moulding, **118** 109
Beam-column connection
Finite element modelling of the semi-rigid behaviour of pultruded FRP connections, **119** 98
Biomimetic design
Development of solid–fluid biomimetic composites. Load dispersion effect of controlled hydrostatic pressure, **119** 65
Body armour
Preliminary investigations into the mechanical properties of a novel shock absorbing elastomeric composite, **119** 379
Briquetting
Cinematics and volume deformations during roll-press briquetting, **118** 151
Bulge forming
Three-dimensional finite-element simulation of bulge forming, **119** 387
Butt-welded specimens
Experimental study of corrosion fatigue behaviour of welded steel structures, **118** 116

CAD
Construction of PC-based intelligent CAD system for cold forging process design —integration of CAD system and development of input method, **119** 58
CAE system
Development of CAE for predicting stiffness of SMC structure. Estimation of Young's modulus in rib part, **119** 237
Calcium aluminates
Phase compositions and depth-profiling of calcium aluminates in a functionally-graded alumina/calcium-hexaluminate composite, **118** 219
Calcium-hexaluminate
Infiltration and physical characteristics of functionally graded alumina/calcium-hexaluminate composites, **118** 225
Cancellous bone
Development of solid–fluid biomimetic composites. Load dispersion effect of controlled hydrostatic pressure, **119** 65

Elsevier Science B.V.
PII: S0924-0136(01)01205-5

Car bodies
Analysis of stiffness of adhesive joints in car bodies, **118** 95
Carbon dioxide
Production of large size parts by MIM process, **119** 199
Casting
The enhancement of wettability of SiC particles in cast aluminium matrix composites, **119** 329
Catheters
Drawing of Ni–Ti shape-memory-alloy fine tubes used in medical tests, **118** 251
Cement matrix composites
Some characterization techniques for examination of corrosion processes of cement matrix composites, **119** 283
Centrifugal
Effect of process variables on microstructure and segregation in centrifugal casting of C92200 alloy, **118** 122
Ceramic composites
Mechanical properties of ceramic composites, **119** 273
Ceramic tools
The effect of cutting fluids on the machining of hardened AISI 4340 steel, **119** 21
Ceramics
Erosion of ceramics and cermets, **118** 448
Cermets
Erosion of ceramics and cermets, **118** 448
Role of copper in iron–iron boride cermets, **118** 9
Cesium
Synthesis of nanostructured silica via sol–gel process with incorporation of cesium compound, **118** 199
Characteristic of statistical distribution
Application of coefficient of variation in reliability-based mechanical design and manufacture, **119** 374
Characterization techniques
Some characterization techniques for examination of corrosion processes of cement matrix composites, **119** 283
Closed die forging
The use of finite element simulation for optimization of metal forming and tool design, **119** 152
Closed die upsetting
Study on the deformation of die and product in closed die upsetting, **118** 417
Cluster diamond
Processing and characterization of cluster diamond dispersed Al–Si–Cu–Mg composite, **119** 216
Coated tools
Tribology of coated tools in conventional and HSC machining, **118** 377
Coatings
Tool life when high speed ball nose end milling Inconel 718™, **118** 29
Coefficient of variation
Application of coefficient of variation in reliability-based mechanical design and manufacture, **119** 374
CoGa
Diffusion in the intermetallic compound CoGa, **118** 79
Cold forging
A finite element analysis of cold-forging dies using two- and three-dimensional models, **118** 286
Analysis on accuracy of forging die sets by disassembly planning algorithm with multiple agents, **119** 140
Construction of PC-based intelligent CAD system for cold forging process design —integration of CAD system and development of input method, **119** 58
Fundamental aspects for the evaluation of the fatigue behaviour of cold forging tools, **119** 158
Cold-roll forming
Cold-roll forming of small-diameter pipes with pre-notches, **119** 122
Composite
Evaluation of optimisation techniques in the design of composite pipelines, **118** 478
On the optimization of the mechanical behavior of a class of composite systems under both quasi-static and dynamic loading, **119** 222
Aluminium–ferro-chromium composites produced by recycling of chips, **119** 251
Microstructure and properties of the sintered composites from zeolite 4A and magnesium oxide, **119** 288
Composite casting
The wettability of SiC particles by molten aluminium alloy, **119** 324
Composite materials
Automobile leaf springs from composite materials, **118** 58
A note on the corrosion characterisation of ZA-27/zircon particulate composites in acidic medium, **118** 62
Wear characteristics of phosphor–bronze/silicon carbide particulate composites, **118** 65
Compressed materials
Cinematics and volume deformations during roll-press briquetting, **118** 151
Compression moulding
Development of CAE for predicting stiffness of SMC structure. Estimation of Young's modulus in rib part, **119** 237
Computer-aided design
Design and analysis of a virtual factory layout, **118** 403
Constant amplitude corrosion fatigue testing
Experimental study of corrosion fatigue behaviour of welded steel structures, **118** 116
Contour integration method
Experimental study and numerical simulation of preform or sheet exposed to infrared radiative heating, **119** 90
Control-volume method
Experimental study and numerical simulation of preform or sheet exposed to infrared radiative heating, **119** 90
Cooling slope
Casting of aluminum alloy ingots for thixoforming using a cooling slope, **118** 169
Copper alloys
Correlation between stress–strain relation and phase transformation in copper alloys, **119** 244
Co-rotational formulation
Mechanical and numerical modelling of composite manufacturing processes deep-drawing and laying-up of thin pre-impregnated woven fabrics, **118** 460
Corrosion
A note on the corrosion characterisation of ZA-27/zircon particulate composites in acidic medium, **118** 62
Some characterization techniques for examination of corrosion processes of cement matrix composites, **119** 283
Corrosion fatigue
Experimental study of corrosion fatigue behaviour of welded steel structures, **118** 116
Crank shafts
Linkage between quality assurance tools and machinability criteria, **118** 132
Cross rolling
New warm forming processes to produce hollow shafts, **119** 277
Cutting
Use of hydrogen in welding engineering in former times and today, **119** 193
Cutting condition
Selection of cutting conditions and tool flow in flexible manufacturing system, **118** 485
Cutting fluids
The effect of cutting fluids on the machining of hardened AISI 4340 steel, **119** 21

Cutting performance
Study on super-finishing by CBN stone (estimation of cutting performance using average crossing angle), **118** 429
Cutting tool flow
Selection of cutting conditions and tool flow in flexible manufacturing system, **118** 485
Cyclic oxidation
Surface and image analysis of oxides grown and spalled on heat resistant cast steels exposed to thermal cycles, **118** 321

Damage
Drilled hole damage of small diameter drilling in printed wiring board, **118** 436
Identification of the damage parameters for anisotropic materials by inverse technique: application to an aluminium, **118** 472
Databases
Selection of cutting conditions and tool flow in flexible manufacturing system, **118** 485
Debinding
Production of large size parts by MIM process, **119** 199
Decision support system
A decision support system for sheet metal blanking process parameters selection, **118** 371
Deep cryogenic
Effect of deep cryogenic treatment on the mechanical properties of tool steels, **118** 350
Deep drawing
Effect of lap-sheets on deep drawing of metallic foil cups, **119** 48
Deep drawing of process optimized blanks, **119** 127
DEFORM
A finite element analysis of cold-forging dies using two- and three-dimensional models, **118** 286
Deformation twinning
Structure and strain hardening of superalloy AEREX350, **118** 246
Design
Aids to innovation in the design and manufacture of hand-held consumer products, **118** 261
Diecasting machine
Experimental investigation for metal-filling system of pressure diecasting process on a cold chamber machine, **119** 268
Dielectric polymeric materials
Rapid determination of the optimum frequency band and temperature profile using fully computerised VFM oven, **118** 137
Diffusion
Diffusion in nickel-based intermetallic compounds taking the $L1_2$ structure, **118** 82
Diffusion in the intermetallic compound CoGa, **118** 79
Disassembly planning algorithm
Analysis on accuracy of forging die sets by disassembly planning algorithm with multiple agents, **119** 140
Dopant
Properties of rare earth oxide doped translucent polycrystalline alumina, **118** 256
Drawability
Effect of lap-sheets on deep drawing of metallic foil cups, **119** 48
Drilling
Towards the improvement of tool condition monitoring systems in the manufacturing environment, **119** 133
Dry turning operation
Surface roughness prediction based on cutting parameters and tool vibrations in turning operations, **118** 269
Ductile tearing energy
Ductile tearing energy of aluminium alloy sheets determined by the single tensile testing (STT) method, **118** 316

EDM
Non-conventional machining of particle reinforced metal matrix composites, **118** 278
Education
A revolutionary style at third level education towards TQM, **118** 362
Elastomeric foam
Preliminary investigations into the mechanical properties of a novel shock absorbing elastomeric composite, **119** 379
Electron beam welding
Development of crack-free welds in a TiAl-based alloy, **118** 74
Empirical studies
A technique for revealing and agreeing an agenda for process improvement, **118** 216
Energy analysis
Lead as a model material to simulate mandrel rolling of hot steel tube, **118** 422
Environment
Hazardous waste source reduction in materials and processing technologies, **119** 336
Erosion
Erosion of ceramics and cermets, **118** 448
Eutectic alloy
Study on wear properties of aluminium–silicon piston alloy, **118** 69
Experimental measurements
Determination of the laws of polarization by coupling measurements with numerical tool, **118** 368
Explicit formulation
Advances in FE explicit formulation for simulation of metalforming processes, **119** 41
Extrusion
Superplastic backward microextrusion of microparts for micro-electro-mechanical systems, **119** 307

Factory-layout
Design and analysis of a virtual factory layout, **118** 403
FDM
Critical parameters influencing the quality of prototypes in fused deposition modelling, **118** 385
FEA
Mechanical and numerical modelling of composite manufacturing processes deep-drawing and laying-up of thin pre-impregnated woven fabrics, **118** 460
Realistic modelling of earthquake-isolation bearings, **118** 158
Fibre reinforced plastic
Finite element modelling of the semi-rigid behaviour of pultruded FRP connections, **119** 98
Fibre-optic sensor
LED-based fibre-optic sensor for measurement of surface roughness, **119** 299
Fillers
Performance of powder filled resin-bonded diamond wheels in the vertical dry grinding of tungsten carbide, **118** 329
Finite deformation
Mechanical and numerical modelling of composite manufacturing processes deep-drawing and laying-up of thin pre-impregnated woven fabrics, **118** 460
Finite element
Finite element modelling of a submerged arc welding process, **119** 203
Finite element analysis
A finite element analysis of cold-forging dies using two- and three-dimensional models, **118** 286
Modelling the orthogonal machining process using coated cemented carbide cutting tools, **118** 293
Finite element analysis of ISO tank containers, **119** 293

Finite element analysis on the effect of workpiece geometry on the quenching of ST50 steel, **119** 354
Three-dimensional finite-element simulation of bulge forming, **119** 387
Finite element method
A study on the hot-deformation behavior and dynamic recrystallization of Al–5 wt.%Mg alloy, **118** 356
Influence of adhesive characteristics on the transverse free vibration of single lap-jointed cantilevered beams, **119** 366
The use of finite element simulation for optimization of metal forming and tool design, **119** 152
Finite element model
Finite element analysis of melt spun yarn, **118** 454
Finite element modelling
Modelling the orthogonal machining process using coated cemented carbide cutting tools, **118** 293
Finite element simulation
Efficient strategies for the simulation of railway wheel forming, **118** 389
Finite elements
Fundamental aspects for the evaluation of the fatigue behaviour of cold forging tools, **119** 158
Forging
Quench sensitivity and tensile property inhomogeneity in 7010 forgings, **119** 261
Forming
Material property changes associated with laser forming of mild steel components, **118** 40
Application of resistance sintering technique to fabrication of metal matrix composite, **119** 210
Forming limits
Factors influencing the FLD of automotive sheet metal, **118** 1
Forming simulation
Advances in FE explicit formulation for simulation of metalforming processes, **119** 41
Fracture toughness
Mechanical properties of ceramic composites, **119** 273
Frame
Finite element analysis of ISO tank containers, **119** 293
Friction
Friction law for hydrostatic mixed lubrication regime, **118** 101
Functional cermet composite
Aerosol processing of functionally engineered cermet emitters, **119** 104
Functionally graded
Phase compositions and depth-profiling of calcium aluminates in a functionally-graded alumina/calcium-hexaluminate composite, **118** 219
Infiltration and physical characteristics of functionally graded alumina/calcium-hexaluminate composites, **118** 225
Fused deposition modelling
A volumetric approach to part-build orientations in rapid prototyping, **119** 348
Fusion line
Characterization of the GTAW fusion line phases for superferritic stainless steel weldments, **118** 127

Gas sensors
Semiconducting polymers based on tetraizoindole, **119** 344
Gas tungsten arc welding
Characterization of the GTAW fusion line phases for superferritic stainless steel weldments, **118** 127
Gas-chromatograph
Chemically modified glasses for analysis of hydrogen isotopes by gas-chromatography, **118** 309
GFRP
Drilled hole damage of small diameter drilling in printed wiring board, **118** 436
Grain growth
Modelling of hardening due to grain growth for a superplastic alloy, **119** 361
Grinding performance
Performance of powder filled resin-bonded diamond wheels in the vertical dry grinding of tungsten carbide, **118** 329

Hand-held products
Aids to innovation in the design and manufacture of hand-held consumer products, **118** 261
Hardenable aluminium alloys
Deep drawing of process optimized blanks, **119** 127
Hardened steels
The effect of cutting fluids on the machining of hardened AISI 4340 steel, **119** 21
Hazardous wastes
Hazardous waste source reduction in materials and processing technologies, **119** 336
Heat resistant cast steel
Surface and image analysis of oxides grown and spalled on heat resistant cast steels exposed to thermal cycles, **118** 321
Heat treatment
Study on wear properties of aluminium–silicon piston alloy, **118** 69
Quench sensitivity and tensile property inhomogeneity in 7010 forgings, **119** 261
Heating stage
Experimental study and numerical simulation of preform or sheet exposed to infrared radiative heating, **119** 90
High speed machining (HSM)
Tool life when high speed ball nose end milling Inconel 718™, **118** 29
Surface integrity of a high speed milled gamma titanium aluminide, **118** 143
High temperature
Selective laser sintering of TiC–Al_2O_3 composite with self-propagating high-temperature synthesis, **118** 173
High-cycle fatigue
Fundamental aspects for the evaluation of the fatigue behaviour of cold forging tools, **119** 158
High-speed cutting
Tribology of coated tools in conventional and HSC machining, **118** 377
Hollow shafts
New warm forming processes to produce hollow shafts, **119** 277
Honeycomb structure
Development of solid–fluid biomimetic composites. Load dispersion effect of controlled hydrostatic pressure, **119** 65
Hot forging
Efficient strategies for the simulation of railway wheel forming, **118** 389
Hot-and-cold PV rolling
Study on minimum thickness for asymmetrical hot-and-cold PV rolling of sheet considering constant shear friction, **119** 229
HSS
Processing of P/M M2 high speed steels by mould casting using thermosetting binders, **119** 1
Hybrid neural networks
Development of a hybrid neural network system for prediction of process parameters in injection moulding, **118** 109
Hydrogen
Use of hydrogen in welding engineering in former times and today, **119** 193
Hydrostatic pressure
Development of solid–fluid biomimetic composites. Load dispersion effect of controlled hydrostatic pressure, **119** 65

Image analysis
Surface and image analysis of oxides grown and spalled on heat resistant cast steels exposed to thermal cycles, **118** 321
A new flexible high-resolution vision sensor for tool condition monitoring, **119** 73
Impact testing
Preliminary investigations into the mechanical properties of a novel shock absorbing elastomeric composite, **119** 379
Implant testing
Issues in pre-clinical testing of implants, **118** 337
Inconel 617 heat treatment
Fatigue properties of the refurbished INCO-617 alloy, **118** 45
Infiltration-processed
Infiltration and physical characteristics of functionally graded alumina/calcium-hexaluminate composites, **118** 225
Infrared camera
Experimental study and numerical simulation of preform or sheet exposed to infrared radiative heating, **119** 90
Infrared thermal camera
Temperature measurement in single point turning, **118** 301
Injection machine
Metallic powder injection molding using low pressure, **118** 193
Injection moulding
Development of a hybrid neural network system for prediction of process parameters in injection moulding, **118** 109
Injection moulds
Evaluation of inserts for modular thermoplastic injection moulds produced by spin casting, **118** 411
In-plane indentation
Development of solid–fluid biomimetic composites. Load dispersion effect of controlled hydrostatic pressure, **119** 65
In-service welding
Numerical models of in-service welding of gas pipelines, **118** 14
Intermetallic
Reciprocating surface grinding of a gamma titanium aluminide intermetallic alloy, **118** 22
Intermetallics
Diffusion in the intermetallic compound CoGa, **118** 79
Diffusion in nickel-based intermetallic compounds taking the $L1_2$ structure, **118** 82
Inverse method
Identification of the damage parameters for anisotropic materials by inverse technique: application to an aluminium, **118** 472
Iron boride sinters
Role of copper in iron–iron boride cermets, **118** 9
ISO tank containers
Finite element analysis of ISO tank containers, **119** 293
Isotope separation
Chemically modified glasses for analysis of hydrogen isotopes by gas-chromatography, **118** 309

Joining
Application of resistance sintering technique to fabrication of metal matrix composite, **119** 210

Laminar flow
Thermal stresses in thick-walled pipes subjected to fully developed laminar flow, **118** 50
Large size
Production of large size parts by MIM process, **119** 199
Laser
Material property changes associated with laser forming of mild steel components, **118** 40
Non-conventional machining of particle reinforced metal matrix composites, **118** 278
Selective laser sintering of TiC–Al_2O_3 composite with self-propagating high-temperature synthesis, **118** 173
Laser drilling
Characteristics of spatter formation under the effects of different laser parameters during laser drilling, **118** 179
Laser welding
Welding of tailored blanks of different materials, **119** 180
Laws of polarization
Determination of the laws of polarization by coupling measurements with numerical tool, **118** 368
Leaf springs
Automobile leaf springs from composite materials, **118** 58
LED
LED-based fibre-optic sensor for measurement of surface roughness, **119** 299
Load dispersion
Development of solid–fluid biomimetic composites. Load dispersion effect of controlled hydrostatic pressure, **119** 65
Local heat treatment
Deep drawing of process optimized blanks, **119** 127
Loosening
Optimizing study of SLBs for higher anti-loosening performance, **119** 174
Low cycle fatigue
Extremely low cycle (ELC) fatigue cracking behaviour in steel bridge rigid frame piers, **118** 36
LSDYNA3D
Three-dimensional finite-element simulation of bulge forming, **119** 387

M2
Processing of P/M M2 high speed steels by mould casting using thermosetting binders, **119** 1
Machinability
Surface integrity of a high speed milled gamma titanium aluminide, **118** 143
The predictive model for machinability of 304 stainless steel, **118** 442
Tool wear and machinability of X5 CrMnN 18 18 stainless steels, **119** 14
Machining
Optimisation of technology and "quasi honing" of polygon bores, **119** 117
Magneto-impedance
A review on magneto-impedance effect in amorphous magnetic materials, **119** 312
Mandrel rolling
Lead as a model material to simulate mandrel rolling of hot steel tube, **118** 422
Manufacturing technology
Geometric roughness analysis in solid free-form manufacturing processes, **119** 52
Material hardening
Modelling of hardening due to grain growth for a superplastic alloy, **119** 361
Mathematical model
Surface roughness prediction based on cutting parameters and tool vibrations in turning operations, **118** 269
Mechanical properties
Mechanical properties of ceramic composites, **119** 273
Melt drag twin roll caster
Roll casting of aluminum alloy strip by melt drag twin roll caster, **118** 165
Melt spinning
Finite element analysis of melt spun yarn, **118** 454
Metal foil
Effect of lap-sheets on deep drawing of metallic foil cups, **119** 48
Metal forming
Friction law for hydrostatic mixed lubrication regime, **118** 101

The use of finite element simulation for optimization of metal forming and tool design, **119** 152
Metal matrix composite
Application of resistance sintering technique to fabrication of metal matrix composite, **119** 210
Turning of metal matrix composites, **119** 257
Metal-filling system
Experimental investigation for metal-filling system of pressure diecasting process on a cold chamber machine, **119** 268
Metallic glasses
Development of metallic glass loaded polymer paste, **119** 318
Microforming
Superplastic backward microextrusion of microparts for micro-electro-mechanical systems, **119** 307
Microstructure
Microstructure and properties of the sintered composites from zeolite 4A and magnesium oxide, **119** 288
On the optimization of the mechanical behavior of a class of composite systems under both quasi-static and dynamic loading, **119** 222
Microwave joining
Microwave joining of 48% alumina–32% zirconia–20% silica ceramics, **118** 88
MIG/MAG welding
Welding of tailored blanks of different materials, **119** 180
MIM
Processing of P/M M2 high speed steels by mould casting using thermosetting binders, **119** 1
Production of large size parts by MIM process, **119** 199
Minimum thickness
Study on minimum thickness for asymmetrical hot-and-cold PV rolling of sheet considering constant shear friction, **119** 229
Mixed lubrication
Friction law for hydrostatic mixed lubrication regime, **118** 101
MMC processing
The enhancement of wettability of SiC particles in cast aluminium matrix composites, **119** 329
The wettability of SiC particles by molten aluminium alloy, **119** 324
Model material
Lead as a model material to simulate mandrel rolling of hot steel tube, **118** 422
Modified glasses
Chemically modified glasses for analysis of hydrogen isotopes by gas-chromatography, **118** 309
Mold
Metallic powder injection molding using low pressure, **118** 193
Monitoring system
Towards the improvement of tool condition monitoring systems in the manufacturing environment, **119** 133
Multiphase sintering
Role of copper in iron–iron boride cermets, **118** 9

Nano-crystalline ferromagnets
Development of metallic glass loaded polymer paste, **119** 318
Nd:YAG laser
Characteristics of spatter formation under the effects of different laser parameters during laser drilling, **118** 179
Non-Newtonian fluid
Determination of the pressure dependent viscosity of non-Newtonian fluid using a new rheometrical device, **119** 146
Numerical identification
Determination of the laws of polarization by coupling measurements with numerical tool, **118** 368
Numerical modelling
Numerical models of in-service welding of gas pipelines, **118** 14

Optimisation
Evaluation of optimisation techniques in the design of composite pipelines, **118** 478
Selection of cutting conditions and tool flow in flexible manufacturing system, **118** 485
On the optimization of the mechanical behavior of a class of composite systems under both quasi-static and dynamic loading, **119** 222
Orientation
Factors influencing the FLD of automotive sheet metal, **118** 1
Orthogonal machining process
Modelling the orthogonal machining process using coated cemented carbide cutting tools, **118** 293
Orthopaedics
Issues in pre-clinical testing of implants, **118** 337

Part orientation
A volumetric approach to part-build orientations in rapid prototyping, **119** 348
PCD and CVD diamond tools
Turning of metal matrix composites, **119** 257
Phase composition
Phase compositions and depth-profiling of calcium aluminates in a functionally-graded alumina/calcium-hexaluminate composite, **118** 219
Phase transformation
Development of crack-free welds in a TiAl-based alloy, **118** 74
Correlation between stress–strain relation and phase transformation in copper alloys, **119** 244
Phosphor–bronze
Wear characteristics of phosphor–bronze/silicon carbide particulate composites, **118** 65
Pipeline
Evaluation of optimisation techniques in the design of composite pipelines, **118** 478
Pipes
Thermal stresses in thick-walled pipes subjected to fully developed laminar flow, **118** 50
Pipe-wall failure
Numerical models of in-service welding of gas pipelines, **118** 14
Plain woven cloth
Drilled hole damage of small diameter drilling in printed wiring board, **118** 436
Plasma impedance monitor
Modeling of harmonic contributions to non-symmetrical RF plasmas, **118** 343
Plasma modeling
Modeling of harmonic contributions to non-symmetrical RF plasmas, **118** 343
Plausibility
Realistic modelling of earthquake-isolation bearings, **118** 158
Pollution
Hazardous waste source reduction in materials and processing technologies, **119** 336
Polycrystalline alumina
Properties of rare earth oxide doped translucent polycrystalline alumina, **118** 256
Polygon joints
Optimisation of technology and "quasi honing" of polygon bores, **119** 117
Polyphthalocyanines
Semiconducting polymers based on tetraizoindole, **119** 344
Porosity
Microstructure and properties of the sintered composites from zeolite 4A and magnesium oxide, **119** 288
Powder injection
Metallic powder injection molding using low pressure, **118** 193

Powder metallurgy
Production of Ti–6%Al–7%Nb alloy by powder metallurgy (P/M), **118** 212
Processing and characterization of cluster diamond dispersed Al–Si–Cu–Mg composite, **119** 216
Precision optics
A framework of a virtual machining and inspection system for diamond turning of precision optics, **119** 27
Prediction
Sliding wear prediction of ductile materials, **118** 205
Predictive model
The predictive model for machinability of 304 stainless steel, **118** 442
Pre-impregnated woven fabric
Mechanical and numerical modelling of composite manufacturing processes deep-drawing and laying-up of thin pre-impregnated woven fabrics, **118** 460
Pre-notch
Cold-roll forming of small-diameter pipes with pre-notches, **119** 122
Pressure history
Experimental investigation for metal-filling system of pressure diecasting process on a cold chamber machine, **119** 268
Printed wiring board
Drilled hole damage of small diameter drilling in printed wiring board, **118** 436
PRMMC
Non-conventional machining of particle reinforced metal matrix composites, **118** 278
Process capability
Improving manufacturing costs and lead times with quality-oriented operating curves, **119** 83
Process design
Construction of PC-based intelligent CAD system for cold forging process design —integration of CAD system and development of input method, **119** 58
Process improvement
A technique for revealing and agreeing an agenda for process improvement, **118** 216
Process modelling
A technique for revealing and agreeing an agenda for process improvement, **118** 216
Process optimisation
A framework of a virtual machining and inspection system for diamond turning of precision optics, **119** 27
Process planning
A decision support system for sheet metal blanking process parameters selection, **118** 371
Production management
Improving manufacturing costs and lead times with quality-oriented operating curves, **119** 83
Properties
Material property changes associated with laser forming of mild steel components, **118** 40
Prosthesis
Issues in pre-clinical testing of implants, **118** 337
Prototyping
Selective laser sintering of TiC–Al_2O_3 composite with self-propagating high-temperature synthesis, **118** 173

Quality assurance
Linkage between quality assurance tools and machinability criteria, **118** 132
Quality-oriented operating curves
Improving manufacturing costs and lead times with quality-oriented operating curves, **119** 83
Quasi honing
Optimisation of technology and "quasi honing" of polygon bores, **119** 117
Quenching
Finite element analysis on the effect of workpiece geometry on the quenching of ST50 steel, **119** 354
Quenching zone
Finite element analysis of melt spun yarn, **118** 454

Rapid prototyping
Critical parameters influencing the quality of prototypes in fused deposition modelling, **118** 385
A volumetric approach to part-build orientations in rapid prototyping, **119** 348
Geometric roughness analysis in solid free-form manufacturing processes, **119** 52
Rapid tooling
Evaluation of inserts for modular thermoplastic injection moulds produced by spin casting, **118** 411
Rare earth oxide
Properties of rare earth oxide doped translucent polycrystalline alumina, **118** 256
Reactive ion etching
Modeling of harmonic contributions to non-symmetrical RF plasmas, **118** 343
Recrystallization
A study on the hot-deformation behavior and dynamic recrystallization of Al–5 wt.%Mg alloy, **118** 356
Recycling
Aluminium–ferro-chromium composites produced by recycling of chips, **119** 251
Hazardous waste source reduction in materials and processing technologies, **119** 336
Reliability-based mechanical design
Application of coefficient of variation in reliability-based mechanical design and manufacture, **119** 374
Residual stress
Finite element analysis on the effect of workpiece geometry on the quenching of ST50 steel, **119** 354
Residual stress and strain
Finite element modelling of a submerged arc welding process, **119** 203
Resin-bonded diamond wheels
Performance of powder filled resin-bonded diamond wheels in the vertical dry grinding of tungsten carbide, **118** 329
Resistance sintering
Application of resistance sintering technique to fabrication of metal matrix composite, **119** 210
Rheometer
Determination of the pressure dependent viscosity of non-Newtonian fluid using a new rheometrical device, **119** 146
Ring rolling
Efficient strategies for the simulation of railway wheel forming, **118** 389
Roll casting
Roll casting of aluminum alloy strip by melt drag twin roll caster, **118** 165
Rubber
Realistic modelling of earthquake-isolation bearings, **118** 158

Screw fastener
Optimizing study of SLBs for higher anti-loosening performance, **119** 174
Segregation
Effect of process variables on microstructure and segregation in centrifugal casting of C92200 alloy, **118** 122

Seismic loading
Extremely low cycle (ELC) fatigue cracking behaviour in steel bridge rigid frame piers, **118** 36
Self-propagating high temperature synthesis
Selective laser sintering of TiC–Al_2O_3 composite with self-propagating high-temperature synthesis, **118** 173
Semi-rigid
Finite element modelling of the semi-rigid behaviour of pultruded FRP connections, **119** 98
Semi-solid
Roll casting of aluminum alloy strip by melt drag twin roll caster, **118** 165
Casting of aluminum alloy ingots for thixoforming using a cooling slope, **118** 169
Sensors
Towards the improvement of tool condition monitoring systems in the manufacturing environment, **119** 133
Shape-memory-alloy
Drawing of Ni–Ti shape-memory-alloy fine tubes used in medical tests, **118** 251
Shaping processes
Mechanical and numerical modelling of composite manufacturing processes deep-drawing and laying-up of thin pre-impregnated woven fabrics, **118** 460
Sheet metal forming
A decision support system for sheet metal blanking process parameters selection, **118** 371
Shielding medium
Dependence of melting rate in MIG/MAG welding on the type of shielding gas used, **119** 185
Shock absorption
Preliminary investigations into the mechanical properties of a novel shock absorbing elastomeric composite, **119** 379
Silica
Synthesis of nanostructured silica via sol–gel process with incorporation of cesium compound, **118** 199
Silicon carbide
Wear characteristics of phosphor–bronze/silicon carbide particulate composites, **118** 65
Simulation
A framework of a virtual machining and inspection system for diamond turning of precision optics, **119** 27
Simulation methods
New warm forming processes to produce hollow shafts, **119** 277
Simultaneous engineering
Selection of cutting conditions and tool flow in flexible manufacturing system, **118** 485
Single lap-jointed cantilevered beam
Influence of adhesive characteristics on the transverse free vibration of single lap-jointed cantilevered beams, **119** 366
Sintered
Radial crushing strength and microstructure of molybdenum alloyed sintered steels, **119** 7
Sintering
Selective laser sintering of TiC–Al_2O_3 composite with self-propagating high-temperature synthesis, **118** 173
The effect of titanium oxide additions on the properties and behaviour of Y-TZP, **119** 112
Small diameter drilling
Drilled hole damage of small diameter drilling in printed wiring board, **118** 436
Small-diameter pipe
Cold-roll forming of small-diameter pipes with pre-notches, **119** 122
SMC
Development of CAE for predicting stiffness of SMC structure. Estimation of Young's modulus in rib part, **119** 237
Sol–gel
Synthesis of nanostructured silica via sol–gel process with incorporation of cesium compound, **118** 199
Solid–fluid composites
Development of solid–fluid biomimetic composites. Load dispersion effect of controlled hydrostatic pressure, **119** 65
Source reduction
Hazardous waste source reduction in materials and processing technologies, **119** 336
Spatter
Characteristics of spatter formation under the effects of different laser parameters during laser drilling, **118** 179
Specimen geometry
Study of the formation of adiabatic shear bands in steels, **119** 234
Spin casting
Evaluation of inserts for modular thermoplastic injection moulds produced by spin casting, **118** 411
Spin extrusion
New warm forming processes to produce hollow shafts, **119** 277
Split algorithm
Advances in FE explicit formulation for simulation of metalforming processes, **119** 41
Spring-back
Study on the deformation of die and product in closed die upsetting, **118** 417
Stainless steel
The predictive model for machinability of 304 stainless steel, **118** 442
Tool wear and machinability of X5 CrMnN 18 18 stainless steels, **119** 14
Standards
Issues in pre-clinical testing of implants, **118** 337
Steel bridge
Extremely low cycle (ELC) fatigue cracking behaviour in steel bridge rigid frame piers, **118** 36
Steels
Radial crushing strength and microstructure of molybdenum alloyed sintered steels, **119** 7
Study of the formation of adiabatic shear bands in steels, **119** 234
Step–lock–bolt
Optimizing study of SLBs for higher anti-loosening performance, **119** 174
Stiffness
Analysis of stiffness of adhesive joints in car bodies, **118** 95
Strain gauge
Study on the deformation of die and product in closed die upsetting, **118** 417
Strain hardening
Structure and strain hardening of superalloy AEREX350, **118** 246
Strain history
Factors influencing the FLD of automotive sheet metal, **118** 1
Stress–strain curve
A vision-integrated tension test for use in sheet-metal formability studies, **118** 238
Stress–strain relation
Correlation between stress–strain relation and phase transformation in copper alloys, **119** 244
Stretch blow moulding
Experimental study and numerical simulation of preform or sheet exposed to infrared radiative heating, **119** 90
Supercritical
Production of large size parts by MIM process, **119** 199
Superferritic stainless steel
Characterization of the GTAW fusion line phases for superferritic stainless steel weldments, **118** 127

Super-finishing
Study on super-finishing by CBN stone (estimation of cutting performance using average crossing angle), **118** 429
Superplasticity
The influence of the thermomechanical processing and forming parameters on superplastic behaviour of the 7475 aluminium alloy, **118** 397
Modelling of hardening due to grain growth for a superplastic alloy, **119** 361
Superplastic backward microextrusion of microparts for micro-electro-mechanical systems, **119** 307
Surface alloying
Characterisation and tribological evaluation of a nickel surface alloyed aluminium-based material, **118** 187
Surface grinding
Reciprocating surface grinding of a gamma titanium aluminide intermetallic alloy, **118** 22
Surface integrity
Tool life and surface integrity in turning titanium alloy, **118** 231
Surface roughness
Surface roughness prediction based on cutting parameters and tool vibrations in turning operations, **118** 269
LED-based fibre-optic sensor for measurement of surface roughness, **119** 299
Surface roughness characterisation
Geometric roughness analysis in solid free-form manufacturing processes, **119** 52

Taguchi
Critical parameters influencing the quality of prototypes in fused deposition modelling, **118** 385
Tailored blanks
Welding of tailored blanks of different materials, **119** 180
Temperature measurement
Temperature measurement in single point turning, **118** 301
Tensile test
A vision-integrated tension test for use in sheet-metal formability studies, **118** 238
Ductile tearing energy of aluminium alloy sheets determined by the single tensile testing (STT) method, **118** 316
Thermal stress
Thermal stresses in thick-walled pipes subjected to fully developed laminar flow, **118** 50
Thermionic cathode
Aerosol processing of functionally engineered cermet emitters, **119** 104
Thermochemical
Radial crushing strength and microstructure of molybdenum alloyed sintered steels, **119** 7
Thermoforming
Experimental study and numerical simulation of preform or sheet exposed to infrared radiative heating, **119** 90
Thermomechanical treatment
The influence of the thermomechanical processing and forming parameters on superplastic behaviour of the 7475 aluminium alloy, **118** 397
Thick film paste
Development of metallic glass loaded polymer paste, **119** 318
Thickness
Factors influencing the FLD of automotive sheet metal, **118** 1
Thixoforming
Casting of aluminum alloy ingots for thixoforming using a cooling slope, **118** 169
Three-dimensional
Three-dimensional finite-element simulation of bulge forming, **119** 387
TiAl alloys
Development of crack-free welds in a TiAl-based alloy, **118** 74
TIME process
Dependence of melting rate in MIG/MAG welding on the type of shielding gas used, **119** 185
Tin bronze
Effect of process variables on microstructure and segregation in centrifugal casting of C92200 alloy, **118** 122
Titania
The effect of titanium oxide additions on the properties and behaviour of Y-TZP, **119** 112
Titanium alloy
Production of Ti–6%Al–7%Nb alloy by powder metallurgy (P/M), **118** 212
Tool life and surface integrity in turning titanium alloy, **118** 231
Titanium aluminide
Reciprocating surface grinding of a gamma titanium aluminide intermetallic alloy, **118** 22
Tool condition monitoring
A new flexible high-resolution vision sensor for tool condition monitoring, **119** 73
Towards the improvement of tool condition monitoring systems in the manufacturing environment, **119** 133
Tool defect classification
A new flexible high-resolution vision sensor for tool condition monitoring, **119** 73
Tool life
Tool life and surface integrity in turning titanium alloy, **118** 231
Tool management
Selection of cutting conditions and tool flow in flexible manufacturing system, **118** 485
Tool steels
Effect of deep cryogenic treatment on the mechanical properties of tool steels, **118** 350
Tool vibration
Surface roughness prediction based on cutting parameters and tool vibrations in turning operations, **118** 269
Tool wear
Linkage between quality assurance tools and machinability criteria, **118** 132
Tool life when high speed ball nose end milling Inconel 718™, **118** 29
Tribology of coated tools in conventional and HSC machining, **118** 377
Tool wear and machinability of X5 CrMnN 18 18 stainless steels, **119** 14
Tools
Selection of cutting conditions and tool flow in flexible manufacturing system, **118** 485
TQM
A revolutionary style at third level education towards TQM, **118** 362
Transverse free vibration
Influence of adhesive characteristics on the transverse free vibration of single lap-jointed cantilevered beams, **119** 366
Tribology
Characterisation and tribological evaluation of a nickel surface alloyed aluminium-based material, **118** 187
Study on wear properties of aluminium–silicon piston alloy, **118** 69
Tribology system
Tribology of coated tools in conventional and HSC machining, **118** 377
Trim die
A finite element analysis of cold-forging dies using two- and three-dimensional models, **118** 286

Tube drawing
Drawing of Ni–Ti shape-memory-alloy fine tubes used in medical tests, **118** 251
Turning
Turning of metal matrix composites, **119** 257

Ultra-precision diamond turning
A framework of a virtual machining and inspection system for diamond turning of precision optics, **119** 27

Vacuum hot pressing
Production of Ti–6%Al–7%Nb alloy by powder metallurgy (P/M), **118** 212
Variable frequency microwave oven
Rapid determination of the optimum frequency band and temperature profile using fully computerised VFM oven, **118** 137
View factor computation
Experimental study and numerical simulation of preform or sheet exposed to infrared radiative heating, **119** 90
Virtual manufacturing
A framework of a virtual machining and inspection system for diamond turning of precision optics, **119** 27
Virtual reality
Design and analysis of a virtual factory layout, **118** 403
Viscosity
Determination of the pressure dependent viscosity of non-Newtonian fluid using a new rheometrical device, **119** 146
Viscous flow
Preliminary investigations into the mechanical properties of a novel shock absorbing elastomeric composite, **119** 379
Volumetric error (VE)
A volumetric approach to part-build orientations in rapid prototyping, **119** 348

Wear
Sliding wear prediction of ductile materials, **118** 205
Temperature measurement in single point turning, **118** 301
Welding
Finite element modelling of a submerged arc welding process, **119** 203
Use of hydrogen in welding engineering in former times and today, **119** 193
Welding productivity
Dependence of melting rate in MIG/MAG welding on the type of shielding gas used, **119** 185
Wettability
The enhancement of wettability of SiC particles in cast aluminium matrix composites, **119** 329
The wettability of SiC particles by molten aluminium alloy, **119** 324

Yield surface
The effects observed in engineering materials after annealing and ageing processes, **119** 165

Za-27 alloy
A note on the corrosion characterisation of ZA-27/zircon particulate composites in acidic medium, **118** 62
Zirconia
The effect of titanium oxide additions on the properties and behaviour of Y-TZP, **119** 112
Zirconia ceramics
Microwave joining of 48% alumina–32% zirconia–20% silica ceramics, **118** 88
